

# ABDULAZIZ AL SARAN

Cybersecurity Specialist | Network Technician

Aspiring cybersecurity professional with strong skills in network installation, configuration, maintenance, and security. Experienced in practical academic projects involving network operations, threat detection, and vulnerability assessment. Holds certifications in ethical hacking and network administration. Currently completing a Bachelor's degree in Cybersecurity, with a solid foundation in both technical and theoretical aspects of the field.

## Education

University: Arab East Colleges  
Qualification: Bachelor's Degree  
Specialization: Cybersecurity  
GPA: 4.83 out of 5

## Personal Info

azooz110633@hotmail.com

As Sahafah, Raed Street,  
Riyadh, Saudi Arabia

Nationality

Saudi Arabian

Date of birth

24/04/2001

## Study Experience

I gained solid experience in networking and cybersecurity through practical projects, such as building a virtual local network, managing hardware-network trade-offs, and researching network service providers. My studies covered LAN/ VLAN/VPN design, wireless attack defense, vulnerability scanning, password attacks, and reverse engineering. For my graduation project, I helped develop a code vulnerability detection system using SAST.

## Skills

Computer skills

Network configuration

Windows server

Building and fixing

Computers

Problem solving skill

negotiation skills

## Certifications

CCNA: Cisco Certified Network Associate – foundational certification in networking, covering routing, switching, and network security.

EC-Council CEH: Certified Ethical Hacker – validates skills in identifying and addressing security threats and vulnerabilities.

EC-Council NDE: Network Defense Essentials – covers essential knowledge for securing and defending network infrastructure.
